

Configurer mon compte Hosted Exchange sur Blackberry Z10 sous OS10

Step 1: Settings

Click **Settings**.

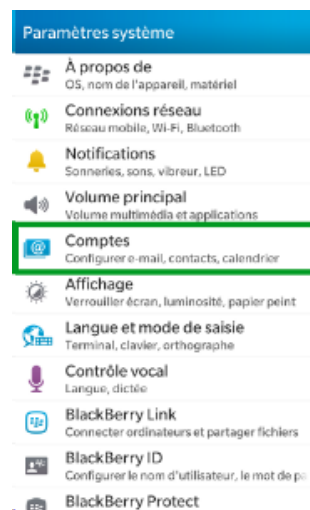

In our example, we configure an Exchange 2013 account on a Z10 Blackberry OS 10.

Make sure that you are connected to the internet via 3G or Wi-Fi.

Step 2: System settings

In system settings, select "Accounts" (Configure email, contacts, calendar).

Step 3: Add an account

Notice that here we can see the other types of account on your device.

Select Add Account.

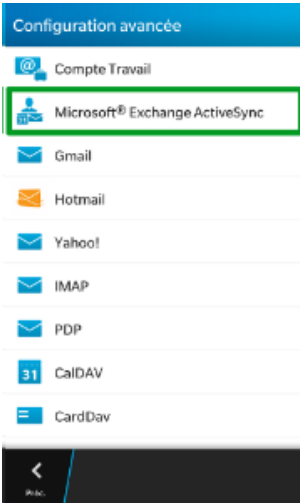

Step 4: Advanced add

Then select Advanced.

Step 5: Advanced configuration

Then select the Microsoft Exchange ActiveSync account type.

Step 6: Account settings

Fill in the following under account settings:

Annuler Ajouter un compte Suivant

Microsoft® Exchange ActiveSync * Champs requis

Description	enter the description of your choice.
Domain	leave this field empty.
Username	your full Exchange email address
Email	your full Exchange email address
Password	The password chosen when creating your Exchange address
Server Address	Outlook.dfinet.ch
Port	443
Use SSL	this must be enabled
Use a VPN	this should be disabled by default.
Download messages while roaming	this allows you to download messages abroad using a mobile internet connection. This may incur extra costs with some operators.
Push	this must be enabled.

Then click **next**

Step 7: Synchronisation options

Select the items you want to synchronise on your BlackBerry. By default, everything is synchronised.

Step 8: Account configured

Your account is now configured - you can access it via your BlackBerry Hub.
